Automatic recognition

The admirable “vision” ...

... without getting into “how?”

Move from an “individual” to the system level

EHEA: building on the tools

- National qualification frameworks: compatibility
- ESG – to establish trust for (E)QA decisions
- ECTS – for both accumulation and transfer
- Diploma supplement

Path to automatic recognition

- ECA
- Bilateral agreements/ regional cooperation
- EQAR – strengthening future role
- “Pathfinder” group: governments

Questions to be answered:

- Coherent implementation across EHEA, with respect to diversity
- Recognition of non-EHEA degrees
- Role of ESG? – current revision process as an opportunity
- Role of ENIC/ NARICs
- Role of stakeholders, students
